The Wim Hof Method Video Course Is Based On Three Powerful Pillars

Cold Therapy

Learn how to tap into the power of the "cold" to burn fat, boost your immune system, improve sleep quality, increase hormone levels, reduce inflammation and increase the "feel good" chemicals in the brain called endorphins (nature's own mood boosters).

Breathing

The majority of us breathe shallow throughout the day resulting in ill health and low energy levels. The scientific breathing techniques you will learn in this course will significantly improve your energy levels, detox the body and release toxins, relieve stress and tension, and strengthen your immune system.

Commitment

The techniques within the cold and breathing effectively need commitment. With this you can go into any depth of your physiology. It is your choice now.
